**Priority Claim**

Applicant is requested to update the "Related Applications" portion of the specification.

**Rejections based on 35 U.S.C. 112, second paragraph**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 41-47, 52 and 58 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 41, it is unclear how the "notch" of line 5 relates to the other claimed elements of the device.

In claim 45, line 1, there is no antecedent basis for "the arm." It appears that applicant intended for the claim to depend from claim 44.

In claim 46, it is unclear how the claimed "notch" relates to that already set forth in parent claim 41.

In claim 52, line 2, it is unclear how the shutter "end" relates to that already set forth in the parent claim 48. Dependent claims must reasonably relate back to the claims from which they depend.

Claim 58 confusingly repeats limitations already found in parent claim 54.

### **Obvious-type Double Patenting Rejections**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 41-59 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over

claims 1-13 of U.S. Patent No. 6,257,883;  
claims 1-22 of U.S. Patent No. 5,913,680;  
claims 1-10 of U.S. Patent No. 5,857,850; and  
claims 1-15 of U.S. Patent No. 5,474,445.

Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in the art would have found it obvious to have presented the earlier claimed orthodontic bracket in the broader terms of the present claims. Setting forth a previously claimed apparatus in broader claim language is obvious.

### Rejections based on Prior Art

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 41-59 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosenberg (4,634,662).

Note Figure 5 of Rosenberg reproduced below with identified elements meeting the claim limitations.
